Rose-Hulman Institute of Technology’s Mechanical Engineering Department, a recognized leader in undergraduate engineering education, invites applications for multiple tenure-track positions to begin fall 2018 or later. Rose-Hulman’s mission is “to provide our students with the world’s best undergraduate science, engineering, and mathematics education in an environment of individual attention and support.” In alignment with this, successful applications will include:

- A teaching statement that demonstrates that you share our passion for teaching in the context of our mission
- A professional development statement that explains what you would like to do to continue your intellectual growth
- A cover letter that summarizes key ideas in your statements and also highlights your particular strengths, experiences, or perspectives that might help us broaden and enhance our students’ experiences
- A curriculum vitae

We welcome applicants at any rank and from all areas of expertise, although we are particularly interested in hiring at least one additional faculty member with a background in thermal-fluids. Candidates with industrial experience are especially encouraged to apply. Applicants must have a B.S. degree and a doctorate in mechanical engineering or a closely related field; applicants whose doctorates are nearly complete will also be considered. Essential job functions include: classroom teaching and laboratory instruction; student advising; curriculum development and improvement; professional development; and service and committee work.

Additional information on Rose-Hulman and the ME department is available at: http://www.rose-hulman.edu. Applicants who advance through the initial screening will be asked for three references who will submit recommendation letters. For full consideration candidates should submit materials on or before November 26, 2017. Submit materials on-line at https://jobs.rose-hulman.edu EEO/AA
